

README

1. To use the script for the first time, follow these steps:
2. Open the CSV_XLSX_TO_PDF folder in your Command Prompt (CMD) or Terminal (If you are using Linux)
3. Write this line in the CMD/Terminal:

pip install -r requirements.txt

4. Now run the pdf_script.py using the following command:

python pdf_script.py data.csv

If you are using Linux then:

python3 pdf_script.py data.csv

5. Replace data.csv with the actual file path you want to process.
